

CARATTERISTICHE STANDARD

- Heavy-duty mild steel construction
- "Modular" design
- Big bag mm1000x1000x1000h
- Capacity 1000 Kg
- Bag lift spreader
- Vent Connection

OPZIONI STANDARD

- Electric Hoist (2000 kg) with:
 - 1.5 / 6m / min lift speed
 - Pendant controls
 - Power Trolley (3.5 / 14m / min travel speed)
- Pneumatic bag agitators with:
 - °(2) air cylinders
 - °Solenoids to control agitation
- Customize (enlarged) bottom frame for high volume container or transporter

SPECIFICHE

- 5.5 bar clean-dry-air at correct pressure dew point
- 400V / 3 Ph / 50 Hz
- Supplies 24 Vdc
- Weight= 1460 kg

OPZIONI NO STANDARD

- Custom units application
- Transition hopper
- Design for Big Bag with dimensions:
 - 950x950 - 1050x1050mm
- Capacity 500÷2000 Kg
- Stainless contact surfaces and structure (SS304 / SS 316)
- Compliant to Atex 94 / 9 / CE zona 20 / 21 - 20 / 22
- Control Panel

Designed for big bag unloaders, M358 is a modular & expandable discharging system,full accessories, that avoid direct contacts between product and worker.

Ideal for applications with frequently change of product, can have integrated filter and can be connected to a centralized ventilation.
